DETAILED ACTION

Allowable Subject Matter

Claims 1-6 and 14-16 are allowed.

The following is an examiner's statement of reasons for allowance: As the claimed invention was read in light of the specification, the prior art of record fails to disclose or render obvious a mass spectrometer, comprising an ion source for generating and accelerating ions along a flight path, a flight tube downstream from said ion source for shielding said ions said flight tube having an electrically insulating inner surface, an ion mirror abutting said inner surface and comprising a front electrode, middle electrode and a rear electrode, each of said electrodes designed for receiving ions and creating an electric field which retards and reflects said ions, and an ion detector for receiving ions reflected from said ion mirror.

The closest prior art, Zhang et al. and Hanson (6,013,913), teach a mass spectrometer comprising an ion source, flight tube having an electrically insulating inner surface, an ion mirror comprising a front electrode, middle electrode, and a rear electrode, and an ion detector. However, they do not teach or render obvious the ion mirror abutting the inner surface of the flight tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
